CERAM HARDENER Additive

Information and Technical Support:
export@vermillon-deco.com

PRODUCT DESCRIPTION:
«Ceram Hardener Additive» (sold separately) is an additive to use with C+ Varnish or with Solplus Varnish with high traffic. It highly reinforces scratch resistance. Ideal for high-stress areas or dark colour surfaces sensitive to scratches. Can modify initial shade of colour of decorative concrete. Helps obtain matt appearance if C+ Varnish and extra-matt if Varnish Solplus is used.

NECESSARY TOOLS:
Screwgun and a stirrer
Mask

APPLICATION:
Pour the Ceram Hardener into a bucket. Constantly stirring slowly pour component A (varnish) of C+ Varnish or Solplus Varnish into the same bucket with the help of a stirrer mounted onto a screwgun. To avoid lumps, scrape material from the sides of the bucket. Once these components are mixed, add component B (hardener) of Varnish C+ or of Varnish Solplus, constantly stirring. Filter the mix before application. Then follow instructions for application indicated in the technical specification of Bi Aqua Varnish used.

TIPS:
Never pour Ceram Hardener directly into cans.

PACKAGING AND CONSUMPTION:
175g can of Ceram Hardener to be added to 5.5 litres of Solplus Varnish.
Weight of Ceram Hardener to add to the varnish used in case of partial application.

RECOMMENDATION AND WARNING:
- See the most recent version of this technical specification (www.concrete.decoration.com). Our distributors are at your disposal for any clarification.
- Performance and durability guarantees for the decorative coating may be given only in case a complete system of DecoMat’Pro products is used (primer, product itself, sealer) and strictly according to instructions for application and maintenance of the system. Thus, the manufacturer will not be liable for the poor product’s performance if an application did not conform to our instructions and if the integral system was not used.
- All the information, tips and advice relative to final illustration of DecoMat’Pro products are given in good faith. They are based on knowledge and experience that DecoMat’Pro has acquired so far regarding its products that were appropriately stored and handled, and applied in normal conditions. In practice, the differences between materials, surfaces and specific application conditions are such that provided information, written recommendations or given advice do not imply any warranty of merchantability other than the legal warranty against hidden defects.
- Colours and aspects in our colour charts are indicative, and cannot be considered as contractual. The same is applied for boards and panels displayed at retail outlets. It is preferable to use identical samples as much as possible. These products lead to results with subtle differences that can also arise depending on application conditions (applicator’s gestures, temperature etc).

**SAFETY PRECAUTIONS:**
Components: Contains polymethylham resin.
Store well closed in its original packaging in a fresh and dry place.
Keep locked and out of children’s reach.
The cans must be empty before they are given away to recycling services.
